SUMMARY/OBJECTIVE

Motivated and skilled Computer Science graduate recently completed a PG-Diploma in Big Data Analytics from CDAC Mumbai. With a strong foundation in data science, machine learning, and software development, I bring hands-on experience in building data-driven solutions. Proficient in Python, SQL, Java, Power BI, Tableau, and Big Data tools. Passionate about uncovering insights from complex datasets to enable smarter business decisions. Actively seeking data-focused opportunities to apply and grow my analytical expertises.

EDUCATION

- **Centre for Development of Advance Computing]** Navi Mumbai, India
Post Graduation Diploma in Big Data Analytics (PG-DBDA); February 2025 – August 2025
- **Lakhmi Chand Institute of Technology** Bilaspur, India
Bachelor of Technology - Computer Science Engineering; GPA: 7.8 July 2020 - June 2024
- **Ramapati Higher Secondary School** Chandrapur, India
CGBSE XII ; 73.6% July 2019 - June 2020
- **Pragya Vidya Peet High School** Gharghoda, Raigarh, India
CGBSE X ; 72.16% July 2017 - June 2018

SKILLS SUMMARY

- **Languages:** Python, SQL, AI/ML, HTML, CSS, JAVA(Familiar with OOPs concepts)
- **Big Data Technologies:** Hadoop, HDFS, Hive, YARN, MapReduce, Spark, PySpark
- **Frameworks:** Flask, Scikit, NLTK, Streamlit, TensorFlow
- **Tools:** GIT, GitHub, Linux, AWS

PROJECTS

- **Olist E-com Analysis (Tech: Python, ML, AWS, HTML, CSS, Flask, PowerBI):**
 - Performed end-to-end analysis on Olist E-commerce data to uncover buying patterns, forecast sales, and detect delivery delays using Python, SQL, and machine learning techniques.
 - Built a sentiment analysis pipeline and dashboards to analyze customer emotions, enabling actionable insights for improving satisfaction and operational efficiency.
- **Robotic Hand (Tech: Python, Arduino, OpenCV):**
 - Developed a robotic hand using OpenCV with Python for real-time hand movement detection and tracking via computer vision.
 - Integrated Arduino and servo motors with 3D-printed components to mimic finger movements, enabling precise and flexible mechanical control.
- **Netflix Data Analysis (Tech: Python, Pandas, Matplotlib, Scikit-learn):**
 - Analyzed Netflix's dataset to uncover user preferences, viewing patterns, and content trends using Python-based data processing and visualization.
 - Implemented machine learning models to predict user behavior and optimize content recommendations for improved engagement.

CERTIFICATIONS

- Machine Learning, INTERNSHALA - August 2023
- Data Science, PREGRAD - July, 2023
- HackerRank SQL(Intermediate) - August, 2017
- NSS B Certificates - August, 2023
- NSS C Certificates - August, 2024

ACTIVITY

- HackerRank: 4 stars in Python, 4 stars in SQL
- Intermediate-level chess player with strong strategic thinking and problem-solving skills..
- Participated in 3 NSS 7-day social service camps, contributing to community development and social awareness initiatives.
- Event Organizer at LCIT(My College) - Conducted online and offline technical & soft-skills training (Seminars / webinars), Annual Function Fresher Party, Farewell party, Blood donation camp.
